

# RING SIZING

## REIGNE'S RING SIZE GUIDE

To determine your ring size you can use either method 1 or 2 below. Please keep in mind that:

1. It is best not to measure your finger when it is hot or cold.
2. Your two hands may slightly differ in size, and therefore a ring worn on a finger on the left hand may not be a perfect fit for the same finger on the right hand.
3. For best results measure your finger at the end of the day.
4. Measure the largest part of your finger (remember that the ring must go over your knuckle and pass easily along the whole finger).

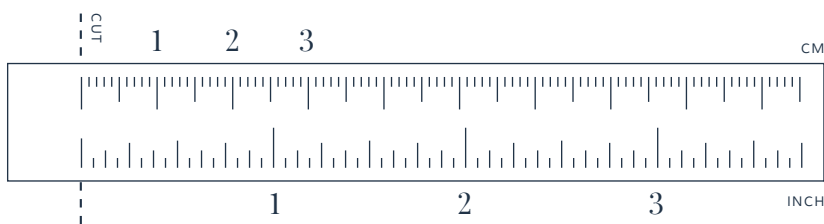

## 1. FINGER MEASUREMENT

To determine your ring size, measure your finger following the instructions ahead:

1. Print this page making sure the scale to fit option is unchecked in the print dialog box. Cut out the tape measure for use. Alternatively, you can use your own tape measure.
2. Wrap the tape measure around the largest part of your finger.
3. Note the measurement and compare this with REIGNE's Ring Size table on page 3 of this document
4. If you hesitate between two sizes it's best to choose the larger of the two.

## TAPE MEASURE

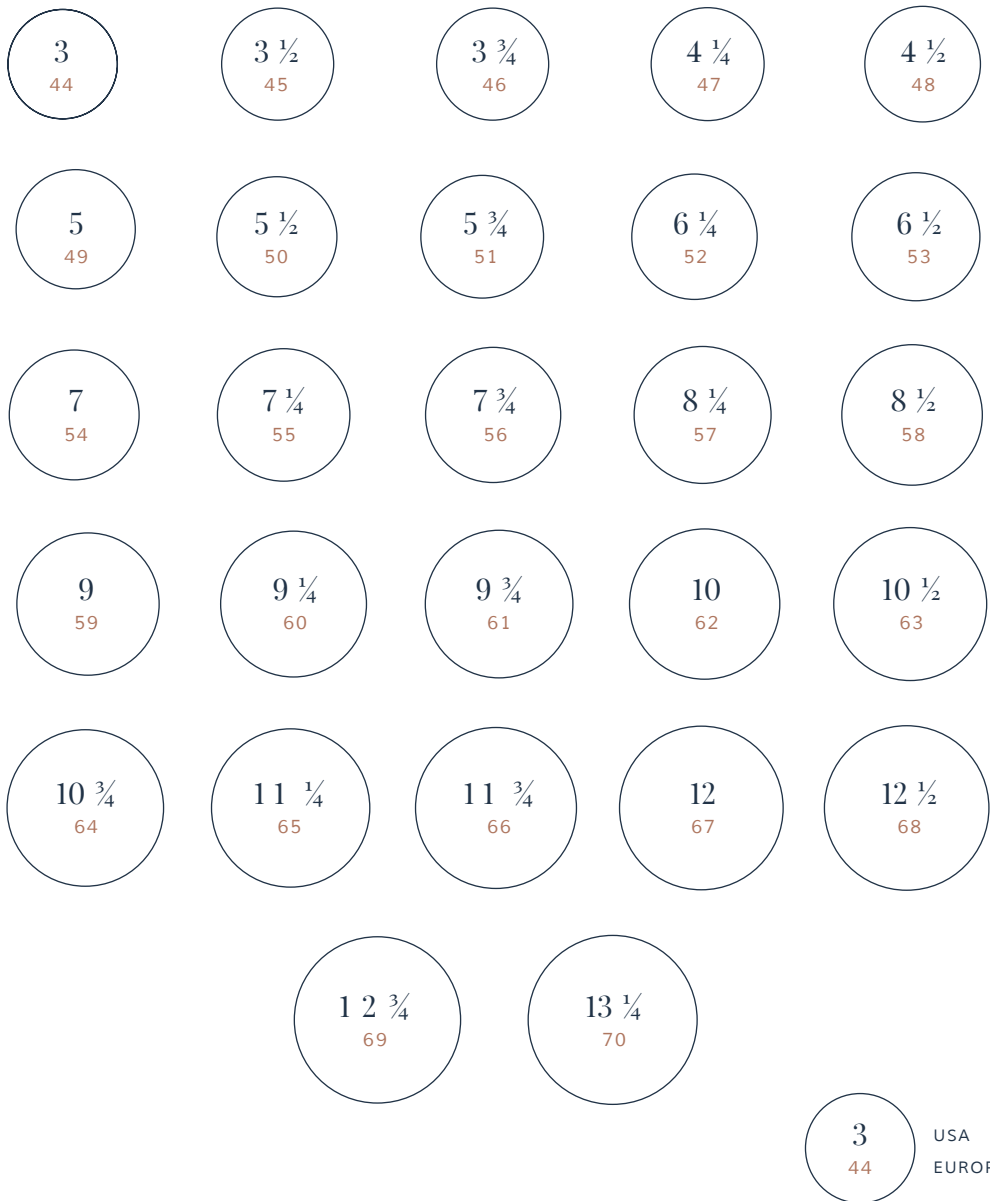

\*Please note that REIGNE uses US ring sizing. Should you need to convert your ring size to a US size, see REIGNE's Ring Size Table on page 3.

## 2. EXISTING RING MEASUREMENT

To determine your ring size, Measure your existing ring following the instructions ahead:

1. Print this page ensuring that the scale is set to "none" in the print dialog box.
2. Position the ring that already fits your finger over the circles shown in the ring size page to determine which one matches your ring size.\*
3. The diameter of the ring circle should match with the diameter of your ring.
4. If you hesitate between two sizes it's best to choose the larger of the two.

### CONVERSION CHART

\*Please note that REIGNE uses US ring sizing. Should you need to convert your ring size to a US size, see REIGNE's Ring Size Table on page 3.

# RING SIZING TABLE

MM	INCH	US	EU
44.2	1.740	3	44
45.5	1.790	3½	45
46.1	1.815	3¾	46
47.4	1.865	4¼	47
